

Alternative Fuel Vehicles and Fueling Infrastructure

Goals:

1. Improve air quality through increased deployment of cleaner, advanced technology and AFVs and related fueling infrastructure.
2. Reduce petroleum use in the transportation sector.
3. Stimulate additional public/private sector investment in alternative fuel and advanced technology vehicles and refueling infrastructure.

Alternative Fuel Vehicles and Fueling Infrastructure

Funds may be requested for 33.6% of the total project for dedicated AFVs, advanced technology vehicles and fueling infrastructure:

- Up to 80% of the incremental cost of dedicated AFVs up to a maximum of:
 - \$6,000 for light duty vehicles (<8,500 lbs).
 - \$12,000 for medium duty vehicles
 - \$80,000 for heavy duty vehicles (>14,000 lbs).

Alternative Fuel Vehicles and Fueling Infrastructure

- Up to 80 % of the cost of equipment and installation of fueling infrastructure for alternative fuels (excluding biodiesel fueling infrastructure) up to \$200,000. Preference will be given for fueling infrastructure that is publicly accessible.
- Up to 80 % of the cost of additional project costs associated with education and outreach, not to exceed \$1,000.

Alternative Fuel Vehicles and Fueling Infrastructure

Please note:

- All Applicants must provide for a minimum non-federal cost share of 66.4% of total project costs.

Projects must be located in the following NH Counties.

Hillsborough,
Merrimack,
Strafford and
Rockingham Counties.

Maine

Clean Communities

Maine AFV Incentives

- 25% Tax credit on the cost of developing clean fuel infrastructure
- Auto Insurers are allowed to offer incentive rates to encourage policyholders to use clean fuel vehicles

Fuel Tax Equalization for Clean Fuels in Maine

Fuel	BTU/Gallon	Ratio	Tax Rate
Gasoline	115,000	100%	\$0.284/gallon
CNG	115,000	100% *	\$0.284/gge *
Diesel	128,400	100%	\$0.296/gallon
LNG	73,500	57%	\$0.169/gallon

gge = gasoline gallon equivalent
